1. What DOTUSA is

DOTUSA is the community coin of the .usa name family. If you own a .usa name, you can claim free coins - once per name, forever. The coin lives on the Base network and you can send it freely. It is a community coin: it has no promised money value.

2. Live today

Claims are open at **claim.owndotusa.com**. Connect your wallet, the site finds every .usa name you own by itself, and your coins arrive in a few clicks.

3. What we plan for holders

PLANNED **Holder levels** - Bronze (1,000+ coins), Silver (5,000+), Gold (20,000+), with a badge on the site and a public holders wall.

PLANNED **Holders showcase** - Gold holders show up to 5 names with marketplace links, Silver up to 3, and the first 3 Bronze holders 1 each. New faces every 2 months.

PLANNED **Spotlight** - one holder's .usa name featured on owndotusa.com and Aapokalypto's channels.

PLANNED **Free personal page** for the biggest holders, inside the Community page.

PLANNED **Community contests** paid in DOTUSA from the reserve - best use of a .usa name, best video.

PLANNED **Premium Telegram channel** - free entry for holders of 1,000+ coins.

PLANNED **Gift drops** on special days (Thanksgiving, Black Friday and similar) for wallets that claimed.

PLANNED **Top holder reward** - a premium .usa name offered to the biggest holder.

4. Your ideas shape what comes next

This plan grows with the community. Share your ideas on Aapokalypto's channels - the best ones join this list.

These are plans, not promises. Dates and features may change as the community grows. DOTUSA has no promised money value. This document is signed with the creator's public pseudonym only.
